

FrontEnd Engineer (React)

We are looking for a qualified Frontend Engineer (React) to join our software development team. You will be responsible for building the client-side of our web applications. You should be able to translate our company and customer needs into functional and appealing interactive applications. If you're interested in creating a user-friendly environment by writing code and moving forward in your career, then this job is for you. We expect you to be a tech-savvy professional, who is curious about new digital technologies and aspires to combine usability with visual design. Ultimately, you should be able to create a functional and attractive digital environment for our own and our client's products, ensuring a great user experience.

Responsibilities

- Develop the frontend of our applications by translating designs into interactive UI using React
- Develop responsive mobile-friendly components and maintain our component library
- Optimize applications for maximum response speed
- Write well-designed, testable code
- Ensure cross-browser compatibility
- Collaborate with back-end developers and UI / UX designers to improve the usability
- Get feedback from, and build solutions for users and customers
- Write functional requirement documents and guides
- Troubleshoot, debug and upgrade existing systems
- Stay up-to-date on emerging technologies
- Write unit and integration tests for frontend functionalities

Requirements

- At Least 2 years of hands-on working experience as a Frontend developer with React
- In-depth knowledge of React Hooks, Redux, and React Lifecycle methods
- Experience with markup languages and stylesheets (HTML/CSS)
- Experience with CSS preprocessors like SASS/SCSS
- In-Depth understanding of RESTful APIs and ability to integrate frontend and backend
- Understanding of layout aesthetics, and responsive web development
- Good English communication skills is a must
- Strong analytical, multitasking, and coding skills (clean code!).
- Familiarity with browser testing and debugging
- In-depth understanding of the entire web development process (design, development, and deployment)
- An ability to perform well in a fast-paced environment
- Able to work in a collaborative team
- Self-motivated and strong will to learn and improve
- BSc degree in Computer Science or relevant field is expected but not mandatory!

Additional Requirements:

- You are inspiring team member, proactive communicator and team player
- You understand the requirements of our international clients
- You are humble and know how to encourage your team members.
- Good and friendly character / able to work in a team
- Go-minded spirit ("yes, we can...")
- You want to reach your targets.

Compensation & Other Benefits:

- Monthly compensation package range of Tk. 50,000 to 80,000 based on skills and experience
- Awesome culture - passionate, driven and fun team.
- Excellent learning environment.
- Outpatient & Inpatient medical insurance coverage for you and your family
- Life insurance coverage for you.
- 2 days of weekend (Friday & Saturday)
- Flexible leave management - 36 days of annual leave including public holidays.
- Fully subsidised lunch & snack and unlimited tea/coffee.
- Daylight shifts
- Ability to grow and build a career
